PROFESSIONAL SUMMARY

AI/ML and Full-Stack Developer building Agentic AI, LLM-powered applications, and scalable cloud-native platforms using React, Next.js, Node.js, Python, LangGraph, RAG, Docker, and AWS. Solved 300+ LeetCode problems and actively contribute to open source with 200+ GitHub contributions.

EDUCATION

Bachelor of Technology (Artificial intelligence)	2024 - 2028
Newton School of Technology, Rishihood University	Grade: 8.36/10.0
Intermediate (Class XII)	2023 - 2024
Agrasen DAV Public School ,Ramgarh	Grade: 90.8%
Matriculation (Class X)	2022 - 2023
Agrasen DAV Public School ,Ramgarh	Grade: 86.4%

INTERNSHIPS

Full Stack Developer Intern	January 2026 - June 2026
Brightpoint studios Pvt. Ltd.	Remote
- Built 15+ interactive web experiences using JavaScript, HTML5, CSS, and Phaser.js, implementing modular front-end components and complex business logic. - Developed reusable application modules and integrated dynamic user interactions, reducing development effort by 30%. - Debugged and optimized 50+ client-side issues, improving application stability, load performance, and cross-browser compatibility. - Worked collaboratively in an agile team to deliver high-quality software through feature implementation, testing and code reviews.	

PROJECTS

CineVerse – AI Movie Discovery & Social Streaming Platform (Github)	July 2026
- Architected and developed a full-stack AI-powered movie platform using Next.js, TypeScript, PostgreSQL, Prisma, Clerk, Socket.IO, and TMDB APIs, delivering secure authentication, personalised watchlists, reviews and real-time social features. - Built an agentic AI recommendation engine using LangGraph, LangChain, LLMs, and RAG (FAISS) to enable movie discovery, semantic search, personalised recommendations. - Integrated Socket.IO for real-time messaging while implementing a secure Stripe payment gateway for premium subscriptions. - Containerised and deployed the application on AWS EC2 using Docker, Nginx, GitHub Actions CI/CD, GitHub Container Registry (GHCR), and Neon PostgreSQL, enabling scalable infrastructure, and production-grade DevOps workflows.	
Bodh AI - Autonomous AI tutor (Github) (Demo)	April 2026
- Architected and developed an agentic AI tutoring platform using Python, LangGraph, LangChain, and LLMs, leveraging multi-agent workflows to deliver personalized learning paths, adaptive tutoring, and contextual reasoning. - Built a multi-modal RAG pipeline using FAISS, embeddings, and document processing, enabling intelligent knowledge retrieval from PDFs, PPTs, images, and text for accurate, context-aware responses. - Engineered a full-stack learning platform using Django, Next.js, PostgreSQL, and REST APIs, featuring real-time AI chat, curriculum generation, quiz creation, homework assistance, revision modules, and persistent learner profiles. - Designed an autonomous instructional framework incorporating Gagné's Nine Events of Instruction and simulated learner feedback loops to identify knowledge gaps, adapt content dynamically, and enhance learning outcomes.	
DevSync – AI Career Growth Partner (Github) (Demo)	November 2025
- Architected and developed an AI-powered career mentorship platform using Next.js, Node.js, Express.js, MongoDB, and Gemini API, enabling personalized skill assessments, AI-generated learning roadmaps and intelligent goal recommendations. - Engineered a scalable full-stack architecture with JWT authentication, bcrypt encryption, REST APIs, and MongoDB Atlas, supporting dynamic dashboards, profile management, and end-to-end CRUD operations for goals, tasks, and roadmaps. - Built an interactive developer community ecosystem featuring discussion forums, likes, comments, leaderboards, advanced search, filtering, pagination, and real-time progress tracking with data visualizations for continuous career growth. - Designed and deployed the application using Next.js, Tailwind CSS, Framer Motion, Vercel, Render, and MongoDB Atlas, delivering a responsive, production-ready platform with AI-driven insights, scalable backend services.	

CERTIFICATIONS

BADGE - 4 OPEN SOURCE CONTRIBUTOR Hacktoberfest 2024 (Link)	October 2024
Participated in Hacktoberfest, contributing to open-source projects while collaborating with developers and gaining hands-on experience with Git, GitHub, and community-driven software development.	

SKILLS

Computer Language: C++, HTML, JavaScript, Python, SQL, TypeScript

Courses: Data Structure

Databases & Data Tools: Firebase, MongoDB, MySQL, PostgreSQL, Power BI, Tableau

AI / ML: Generative AI, LangChain, LangGraph, LangSmith, LLM, Machine Learning, n8n Introduction, Natural Language Processing, Natural Language Toolkit (NLTK), OpenAI API, TensorFlow, Transformers, Vector Embeddings, Hugging Face

APIs & Testing: API, Postman

Cloud & DevOps: AWS, Docker, Git and Github, Google Cloud Platform, GitHub Actions

Domain & Business Skills: Figma, UI/UX

Frameworks & Libraries: Chart.js, Django, Express JS, Framer Motion, Matplotlib & seaborn, Next.js, Node.js, NumPy, Pandas, Prisma ORM, React, Tailwind CSS, Three.js, FastAPI
